NEW - 9-0 POLYPROPYLENE SUTURES FROM FCI OPHTHALMICS

FCI Ophthalmics, Inc. is introducing **the** new non-absorbable 9-0 polypropylene surgical sutures for use with their Morcher Cionni Capsular Tension Rings.

FCI Ophthalmics, Inc. is a national company with sales representatives and distributors throughout the United States. Already serving the ophthalmic community with a wide variety of products and devices, FCI Ophthalmics is now also **providing** ophthalmologists with the much sought-after 9-0 polypropylene sutures.

These 9-0 polypropylene sutures are stronger and particularly suitable for use with the Cionni Capsular Tension Rings. These sutures are available in two double-armed versions: one with two long, straight needles, and the other with one long straight needle and one short curved needle. They are packaged in boxes of 12, or individually when accompanied with a purchase of a capsular tension ring.

For more information 9-0 polypropylene sutures and pricing, contact FCI Ophthalmics at 800-932-4202; Fax: 781-826-9062; or email: info@fci-ophthalmics.com
