FDA – Approves Morcher Capsular Tension Rings

Stuttgart, Germany, October 03 – Morcher GmbH, a manufacturer of Intraocular Implants since 1951, has received FDA approval for marketing their capsular tension rings to the ophthalmic profession in the USA.

Three rings, Type 14, 14A and 14C have been approved. The three rings are available in different diameters to accommodate the variations in the size of the individual patient's capsular bag. Morcher capsular tension rings are designed to stabilize the capsule and have undergone extensive clinical testing by a large panel of U.S. ophthalmologists.

Morcher GmbH has announced the appointment of FCI Ophthalmics, Inc. of the USA as their exclusive importer and distributor of the "Morcher" capsular tension rings throughout the United States.
