

No Scar DCR

with high success rates

new

Transnasal Lacrimal Stent

designed by Bruce B. Becker, MD

**Largest diameter
stent stays in
ostium & lacrimal
sac.**

**Inserted through
nose, it does not
pass through the
canaliculi**

- Improves success rates
- Requires no external incision
- Results in quicker recovery time
- Requires no knots or sutures
- May be used with balloon catheter or any endoscopic or external DCR
